Kuang-Chen Lu

Malden, MA 02148 | kuang-chen_lu@brown.edu | 🇹🇼Taiwan (R.O.C.) Citizen

Expecting to graduate in May 2025 with a doctoral degree in Computer Science. I am passionate about using computing skills to make an impact in education. While pursuing my PhD, I have been building and deploying educational software. As a result, I am familiar with both frontend and backend techniques. Furthermore, I know multiple languages and have experience in multiple disciplines.

Education

PhD, *Computer Science* Sept. 2020 – May 2025
Brown University, Providence, RI
Advisor: Shriram Krishnamurthi
Research Area(s): Computing Education, Programming Languages, Formal Methods

MS, *Computer Science* Sept. 2018 – May 2020
Indiana University, Bloomington, IN
Advisor: Jeremy Siek
Research Area(s): Programming Languages (Gradual Typing, Relational Programming)

BS, *Bioinformatics* Sept. 2014 – May 2018
Shanghai Jiao Tong University, Shanghai, China
Advisor: Chaochun Wei
Research Area(s): Bioinformatics (Sequence analysis)

Software and Systems

SMoL Tutor: https://smol-tutor.xyz (*Source code private to prevent cheating; available on request*)
A tutoring system built for teaching misconceptions about the behavior of conventional programming languages. It has been used at 8 institutions (4 domestic and 4 abroad).
Stacker: https://smol-tutor.xyz/stacker/ (*GitHub*: https://github.com/LuKuangChen/stacker-2023)
A visualization tool built for explaining how conventional programming languages behave.
Brown Benchmark for Table Types (B2T2): https://github.com/brownplt/B2T2
A benchmark for programming languages/systems that process tabular data. It assembles table operators that are common in major tabular programming frameworks: R Tidyverse, Python pandas, Julia, LINQ, and SQL.
SMoL Misinterpreters: https://github.com/LuKuangChen/smol-misinterpreters
A collection of interpreters, each of which represent a misconception about programming language behavior.
RPAN: Rice Pan-genome Browser: https://cgm.sjtu.edu.cn/3kricedb/visualization
Visualize the pan-genome of ~3000 rice species. My major contribution is the phylogenetic tree visualizer on the left and its connection with the gene browser on the right.
InstaModel: https://github.com/brownplt/insta-model
A model of the semantics of Static Python, a gradually typed Python supported by Meta's variant of CPython (cinder). The model is shown to match cinder by producing the same results on cinder's test suite.
BUGS VSCode Support: https://github.com/LuKuangChen/vscode-language-bugs
A VSCode extension for the language BUGS (Bayesian inference Using Gibbs Sampling). It implements the Language Service Protocol.
Equivalent of Cast Calculus: https://github.com/LuKuangChen/Equivalence-of-Cast-Calculi
A framework for formally proving the equivalence of cast calculi (e.g., coercions, hypercoercions, and threesomes).

Skills

General Computing: Rust, OCaml, Julia, TypeScript, Java, Python, Racket, C, ReScript
Domain-specific Computing: Quantitative Data Processing (R, MATLAB, Google Sheets), Web (React, Elm, Google Apps Script), Tabular/Relational Programming (SQL, REL, Prolog, miniKanren, LINQ), SVG, (La)TeX, PyTorch, Proof Assistants (Coq, Isabelle, Agda), Formal Methods (Alloy/Forge, PLT Redex)
CS Subfields: Natural Language Processing, Machine Learning, Human-Computer Interaction, Bioinformatics
Other Fields: Biology, Statistics, Math, Cognitive Science, Psychology
Languages: English (Fluent), Mandarin (Native), Taiwanese Hokkien (Native), Cantonese (Native)

Work Experience

R&D Intern May 2023 – Aug. 2023
Compiler/Language Team, Relational AI

- Prevented the compiler from executing ill-formed higher-order relations.
- Compared several ways of defining variadic functions in Julia on their readability and performance.
- Refactored several units of the compiler so that variadic functions are always defined in the best way. The refactoring improves the compiler's performance by several magnitudes on large programs.
- Proposed a solution (which is liked and accepted by the team) to a bug in the handling of generic relations.
- Fixed a bug in the handling of some recursive generic relations.
- Created a tutorial for the rest of the company on how generic relations work.

Teaching Experience

- Teaching Assistant for CSCI 1730 Programming Languages: Fall 2021, Fall 2022, Fall 2023
- Teaching Assistant for CSCI 1260 Compilers: Spring 2021
- Teaching Assistant for C311/B521 Programming Languages: Spring 2019, Fall 2019
